Creative thinking in architecture, engineering and the built environment

SPRINGHILL CARE HOME

We have been involved in all three phases of the Springhill Care Home improvement programme which began in 2008. We were initially involved in the creation of a 16-bed Younger Persons Dependency Unit which, once complete, was quickly followed by the development of a 46 bed specialist care facility for people with dementia.

Prior to these alterations we worked closely with Springhill Care Group in developing an overall estate improvement strategy. This was aimed at reducing the management burden brought about by such significant change. The result was a concept to improve

'front-of-house' services, building management, Reception as well as enhancing the residents access to appropriately designed lounge spaces and ancillary accommodation.

We are delighted that Phase 3 is now complete in a manner that truly supports the clients care delivery ethos. We are proud of our association.
